Apex Digital Systems

# Team Member Operations Manual

Daily operations: prospecting leads, booking review meetings, building quotes, tracking orders and getting paid commissions.

## 1. Getting Started & Account Access

1. Go to **apexdigitalsystems.org/auth** or tap **Team Portal** in the menu or footer.
2. No invite code yet? Tap **Request Invite Code**. Daniel receives a 6-digit code by email and relays it to you (expires in 48 hours).
3. Finish signing up and confirm your email. You automatically get a unique **Employee ID**.
4. Once the owner approves your account, all team tools unlock.

## 2. The Call List & Cold Calling

Open **Team Portal > Call list**.

### Finding businesses

- **Country & Region:** pick your country and optional state/region.
- **Website filter:** *Any* = random mix; *No website yet* = Website Launch leads; *Has a website* = Redesign or SEO Cleanup leads.
- **Business type:** e.g. plumber, electrician, roofer, pest control. Blank = random.
- **City:** type one, or leave blank for a random town (big and small cities balanced).
- Tap **Find businesses**. New results appear at the top. Use **Show queue from** to focus on one area.

### Working a business card (3 shown at a time)

- Tap the **phone number** to call; tap the **address** to open Google Maps; tap the **website** to check it yourself.
- **Analyze business / website** gives strengths, gaps, recommendations and a call opener.

## 3. Booking Appointments & Handling Cards

### Step 1 — Add customer profile

1. Tap **Add customer profile** on the card.
2. Fill in contact name & role, **Appointment (meeting)** date/time, expected-by date, needs, interested package, budget and notes.
3. Tap **Save profile**.

> **Automatic:** you become the **Sales Rep of Record** with your Employee ID, so later edits by teammates never move your credit. The owner gets an email alert with the meeting time (Pacific).

### Step 2 — Choose a card action

- **Called — check off:** add a note like "Review booked Thu 2 PM". Leaves your rotation; find it later in **Call back** search.
- **Skip — no answer:** moves it to the back of *your* queue only. **Reset my queue** brings skips back.
- **Subscriber — stays on board:** pins it in the Subscribers list.
- **No call list — remove:** removes it for the whole team (wrong number, closed, do-not-call).
- **Call back:** search a past business name or phone number and tap **Call back — return to queue**.

## 4. Building & Sending Quotes

Open **Quotes**, or tap **Build quote** on a customer card (details carry over).

1. **Package:** Website Launch $1,000, Website Redesign $1,000, SEO Growth Cleanup $399, or a custom price (Custom App Design & Build is quoted per project).
2. **Add-ons:** extra services with their own prices.
3. **Monthly plan:** Website Care Plan $125/mo or Growth & Maintenance $250/mo. Tick **First month free** for a 30-day trial.
4. **Discount:** dollar or percent off, with a reason the owner can see.
5. **Split payments:** 1–4 parts. Part 1 is paid now; the rest charge the saved card automatically every 30 days.
6. Tap **Create payment link** and text or email the link to the customer.

## 5. Build Orders & Photos

- After the first payment (or an owner-approved $0 order) the quote becomes a **Build Order** under **Orders** and the owner is alerted.
- Upload logos, photos and files (up to 100 MB each) to the order.

## 6. Earnings & Commissions

Open **Earnings** to see your own statement.

- **One-time sales:** 30% of the sale or a $300 minimum, whichever is higher — recorded automatically on the first payment.
- **Monthly recurring:** $10 per month for each active customer you sold, on every real renewal.
- Totals are grouped in biweekly pay periods; the owner marks payouts as paid.

## 7. Cancellations & Refunds

1. Open **Cancellations**.
2. Pick the customer/order, what to cancel (order, monthly plan or both), the reason and any refund request.
3. The owner reviews it. Approval stops future payments and ends the monthly plan.
